Experience

Bartender • Anchor Bay: Bar and Grill

- Cultivated strong interpersonal relationships and customer loyalty through attentive service
- Managed high-pressure multitasking and time-sensitive decision-making
- Trained new staff using structured procedures and performance metrics

Projects

Bird Identification Database

I designed and implemented a database powered by MySQL which allowed the user to query for birds of given marking, size and color. It's intent was to be used as a bird watching system, where users could compare findings with friends.
